EXPERIENCE

AI-Accelerated Product Engineer

[Champion Labs](#)

08/2025 - Present | Houston, TX

- Built and launched SaaS web applications using React, Next.js, Node.js, and Supabase
- Integrated third-party services like Stripe, Twilio, and Google Maps for production applications used internationally
- Designed and developed full-stack applications end-to-end
- Deployed and managed cloud infrastructure for web applications
- Used AI-assisted development tools such as Claude Code and Codex to accelerate product development
- Delivered products from idea to launch and iterated rapidly based on user feedback

Senior Frontend Engineer & Lead Product Designer

[Eleox](#)

04/2023 - 07/2025 | Houston, TX

- Led product design and frontend implementation for OxNom, Eleox's flagship natural gas nomination tool
- Built modular, reusable UI components aligned with a brand-wide design refresh
- Collaborated cross-functionally to turn complex business logic into user-friendly experiences
- Prototyped experimental features and new workflows to support future product initiatives
- Contributed to automated Cypress testing for robust end-to-end feature validation

Senior Frontend Developer

[Adcetera](#)

12/2018 - 04/2023 | Houston, TX

- Engineered custom responsive websites for clients ranging from startups to Fortune 500s
- Integrated CMS platforms like WordPress and Drupal for client-editable content
- Mentored junior developers and introduced a reusable component library to improve delivery speed
- Partnered with designers to scope projects accurately and ensure pixel-perfect builds
- Championed tooling upgrades that boosted team productivity and code quality

Web Developer (Contract @ Chevron Corporation)

[Cella](#)

10/2016 - 12/2018 | Houston, TX

- Contracted as a Web Developer supporting Chevron Corporation's internal platforms
- Supported Chevron's internal training portal through custom frontend development
- Migrated and re-branded intranet sites to align with Chevron's updated brand guidelines
- Streamlined communication between design and development teams to speed up asset handoff and reduce the need for revisions
- Trained and unblocked new developers to accelerate team ramp-up

SUMMARY

Senior Frontend Engineer with 10+ years of experience designing and building modern SaaS and enterprise products.

Specializes in design systems with React and TypeScript, bridging UX and engineering to deliver scalable, maintainable frontends using AI-assisted workflows to accelerate development.

SKILLS

Frontend

HTML5, CSS3, JavaScript, React, TypeScript, Next.js, Component Architecture, State Management (Redux, Context API), Tailwind, SCSS, Web Accessibility (WCAG), Responsive Design, jQuery, Component Libraries, Storybook, E2E Testing, Jest, Cypress, Performance Optimization
