EXPERIENCE

Frontend Engineer

Champion Labs

08/2025 - Present | Houston, TX

- Developed and maintained web applications using React, Next.js, Node.js, and PostgreSQL databases
- Built workflow-driven interfaces for user input, configuration, and data processing
- Integrated third-party APIs including Stripe, Twilio, and Google Maps
- Designed and implemented multi-step user flows and data-driven UI components
- Deployed and maintained applications in cloud environments (Vercel, Supabase, Firebase, GCP, AWS, Netlify, VPS)

Frontend Engineer

Eleox

04/2023 - 07/2025 | Houston, TX

- Developed data-intensive user interfaces using React, TypeScript, and AG Grid to support complex business workflows
- Built and maintained reusable UI components and data tables for filtering, sorting, and manipulating large datasets
- Developed frontend features and integrated REST APIs to power data-driven applications
- Collaborated with backend teams to ensure efficient data flow and performance across the entire Eleox platform
- Contributed to automated Cypress testing for robust end-to-end feature validation

Frontend Developer

Adcetera

12/2018 - 04/2023 | Houston, TX

- Built accessible and responsive frontend interfaces using React, JavaScript, HTML, and CSS for production web applications
- Developed custom frontend implementations for PHP-based CMS platforms (WordPress, Drupal), enabling flexible content management and templating
- Integrated frontend applications with backend systems and APIs to support dynamic, data-driven content
- Built reusable UI components to improve development efficiency and consistency across projects
- Collaborated with designers to deliver pixel-accurate, user-friendly interfaces

Web Developer (Contract @ Chevron Corporation)

Cella

10/2016 - 12/2018 | Houston, TX

- Developed interactive, workflow-driven training experiences using JavaScript, HTML, and CSS for Chevron's internal LMS platform
- Built multi-step user interfaces with gated progression, ensuring users completed required steps before advancing through training modules
- Implemented state-driven UI logic to track user progress, completion status, and quiz outcomes within training workflows
- Designed and developed reusable frontend components aligned with Chevron's design system and strict brand guidelines
- Collaborated with cross-functional teams to deliver intuitive, user-friendly interfaces that improved engagement and completion rates

SUMMARY

Frontend Engineer with 10+ years of experience building React and TypeScript applications in SaaS and e-commerce environments. Experienced in developing scalable, workflow-driven user interfaces and integrating REST APIs to support complex web applications.

Background includes working with e-commerce platforms such as BigCommerce, Shopify, WooCommerce, and Webflow, with a focus on improving onboarding, configuration, and data-driven user experiences.

SKILLS

Frontend

React, TypeScript, JavaScript, Next.js, HTML, CSS, Tailwind CSS, AG Grid, State Management (Redux, Context API), Responsive Design, Web Accessibility (WCAG), Testing (Jest, Cypress)

E-commerce & CMS Development

BigCommerce, WooCommerce, Shopify, Webflow, Magento, WordPress, Drupal

Backend & APIs

Node.js, REST APIs, PostgreSQL, Supabase, Firebase, Express.js, MySQL, PHP, Serverless Functions, Authentication & Authorization (JWT, OAuth), Stripe (Payments), Webhooks

Design Systems & UI/UX

UI/UX Design, Prototyping, Wireframing, Interaction Design, Mobile-First Design, Figma, Sketch, Affinity, Adobe XD, Photoshop, Illustrator

Mobile Development

iOS Development, React Native, Expo, Xcode, App Store Connect approval & deployment, Capacitor

Cloud & DevOps

Environment Configuration & Secrets Management, API Integrations, Vercel, Supabase, Firebase, GCP, AWS, Docker, CI/CD, VPS Hosting, Coolify, GitHub

EDUCATION

The Iron Yard

Frontend Engineering Program

University of Houston - Clear Lake

Art and Design B.F.A.
